We are looking for motivated undergraduate research assistants for 2009 to help with laboratory research in language, memory, reading, and attention.

### Research projects

The Computational Language and Cognition Laboratory conducts experiments with human participants to develop and test computational theories of knowledge and language learning.

**Our current projects are:**
- Inductive learning
- Visual attention in sentence processing
- Knowledge acquisition
- Various simulation models

### Get involved

If you are a motivated student, you can join the lab for credit by enrolling in PSYCH 493/494/495 (Psychology) or Q493/495 (Cognitive Science), or we may hire you as a paid research assistant:
- Gain invaluable experience for graduate school
- See if a career in research is right for you

### Responsibilities

- Human subject running
- Experiment design and analysis
- Weekly lab meetings

### Qualifications

- Interest in language learning and memory
- Dependability and initiative
- Computer experience
- Programming skills a plus

### Get in touch with us:

If you are interested and think you might like to join the lab, get in touch with Dr. Michael Jones at 856.1490 or jonesmn@indiana.edu or go to our website for more info: http://www.indiana.edu/~clcl/
