WHAT EVOLUTION IS NOT

Biological Evolution...

1. is NOT a theory
2. is NOT something one should believe in
3. Is NOT concerned with the origin of life
4. Is NOT just concerned with the origin of humans
5. was NOT discovered or first explained by Charles Darwin
6. is NOT the same thing as natural selection
7. is NOT something that happened only in the past
8. is NOT something that happens to individuals
9. is NOT an accidental or random process
10. does NOT have any evidence against it
11. was NOT contrived to undermine religion
12. does NOT deny the existence of God
13. does NOT conflict with any religion

If these popular ideas about evolution are all wrong, then what IS evolution?
