Early Man & Primate Skull Set (CBS 2003) ER-28-1013 \$1,744.00

Somso: one each P. africanus, H.habilis, /A. africanus, A. boisei, Neandertal, Cro-Magnon, H.sapiens, H.erectus

Calipers, Anthropometric (CBS 2003) ER-69-6245 \$16.25

"Preference" column: recommend getting #1 skulls first (basic sampling), then #2 skulls, then #3 skulls for a most useful collection.

Set of 6 from Ward's (all "V": items, plus a proconsul, which is no longer considered a hominid): \$1,095 (\$23 less than total for the 5 hominids).

Frey Scientific has a nice A. afarensis skull, a composite of different skulls found, for \$169.

Full scale skulls with attached mandibles are probably best for full examination, although their springs often get over-stretched (caution).

May not need to get a modern skull if you already have a detachable one (e.g. on a classroom skeleton): Cro-Magnon is a modern-like H. sapiens.

DISCLAIMER: Prices and numbers subject to change by vendors; be sure to check with catalog or web site of vendor before ordering.
