

SCIENCE IS **NOT** a process that ...

1. can solve any problem or question
2. can ignore rules
3. seeks the truth or facts
4. attempts to prove things
5. can produce any kind of explanation
6. produces certainties or absolute facts
7. can always be relied upon to be totally accurate
8. is always properly used
9. is free from values, opinions or bias
10. in which understanding comes from faith or beliefs
11. in which one solution is as good as another
12. scientific theories are “tentative ideas” or “hunches
