Good news! Your plan covers the preventive services listed here 100 percent as part of preventive care. This includes routine screenings and checkups. It also includes counseling you get to prevent illness, disease or other health problems.

You won’t have to pay anything for these services when:
- You get them from a doctor or other health care provider in our network
- The main purpose of your visit is to get preventive care

That means no copayment and no coinsurance. You don’t have to meet your deductible first.

Many of these services are covered as part of routine physical exams. These include regular checkups, routine gynecological visits and well-child exams. You won’t have to pay out of pocket for these preventive visits, unless you get services not on this list at the same time.

But, these services are not preventive if you get them as part of a visit to diagnose, monitor or treat an illness or injury. Then copays, coinsurance and deductibles apply.

Let your network doctor know that Aetna covers these preventive services 100 percent when they are billed as part of your preventive care. Aetna follows the recommendations of national medical societies about how often children, men and women need these services. Be sure to talk with your doctor about which services are right for your age, gender and health status. Your Aetna plan complies with the new federal health care reform law.

**Covered preventive services for adults**

**Screenings for:**
- Abdominal aortic aneurysm (one-time screening for men of specified ages who have ever smoked)
- Alcohol misuse
- Blood pressure
- Cholesterol (for adults of certain ages or at higher risk)
- Colorectal cancer (for adults over 50)
