Badakhshan Medical Faculty

**The Curriculum Contents Of Human Anatomy
(2002)**

Prepared By: Assistant Prof. Dr. Abdul Qadir Burran

CONTENTS

INTRODUCTION:

An Analysis Of Human Anatomy
Cell Structure
Reproduction Of Cells
The Tissues
Epithelium
The Connective Tissues
The Integument
Appendages Of The Skin

EMBRYOLOGY:

Human development
Early development of the human embryo
The nutrition of the embryo
Development of the individual systems

OSTEOLOGY:

Morphology of the human skeleton
The skeletal connective tissues
The axial skeleton
The skull
The exterior of the skull
Interior of the cranium
The individual cranial bones

Cranial characteristics at different ages

The appendicular skeleton
The skeleton of the upper limb
The skeleton of the hand
The skeleton of the lower limb
The skeleton of the foot

ARTHROLOGY

The individual articulations
Joints of the vertebral column and thorax
Joints of the upper limb
Joints of the lower limb

MYOLOGY

Attachments, general form and actions of hemispheres
Skeletal muscles

Fasciae and muscles of head
Anterolateral muscles and fasciae of
The neck
Fasciae and muscles of the trunk
Fasciae and muscles of the upper limb
Muscles of the lower limb

SPLANCHNOLOGY

The respiratory system
The alimentary system
The teeth
The tongue, pharynx and esophagus
The abdomen
The peritoneum
Abdominal viscera
The urogenital system
The urinary organs
Pelvic viscera
The reproductive organs of the male
The reproductive organs of the female
The endocrine system

ANGIOLOGY:

Haemal And Lymphoid Tissues
Blood Vessels
The Thoracic Cavity And Heart
The Heart
The Arterial System
The Aorta
The Carotid System Of The Arteries
The Subclavian System Of Arteries
The Arteries Of The Trunk
The Arteries Of The Lower Limb
The Venous System
Cardiac Veins
Veins Of The Head And Neck
Veins Of The Upper Limbs
Veins Of The Thorax
Veins Of The Lower Limbs
Veins Of The Abdomen And Pelvis
The Lymphatic System

Neurology

Techniques And Development Of
Neuroanatomy
Cytology Of The Nervous System

Major Divisions Of The Nervous System

Spinal Medulla Of Cord

The Rhomb Encephalon Or Hindbrain

The Medulla Oblongata

The Pons

The Cerebellum

Internal Cerebellum Structure

The Mesencephalon Or Midbrain

The Reticular Formation

The Pros Encephalon Or Forebrain

The Diencephalons Or Interbrain

The Telencephalon Or Endbrain

The Limbic Lobe And Olfactory

The Cerebral Cortex

The Main Cortical Areas

Internal Structures Of The Cerebral

The Meninges

The Peripheral Nervous System

The Cranial Nerves

Morphology Of The Cranial Nerves

The Spinal Nerves

Dorsal Rami Of The Spinal Nerves

Ventral Rami Of The Spinal Nerves

Cervical ventral rami

Thoracic ventral rami

Lumbar ventral rami

Sacral and coccygeal ventral rami

The automatic nervous system

The peripheral apparatus of the special senses

The olfactory apparatus

The visual apparatus

The peripheral visual apparatus

The accessory visual apparatus

The auditory and vestibular apparatus

The internal ear

Literature

1. Chummy etc. Last's Anatomy (10th Edition).
2. Last. Facts figures Anatomy.
3. Inderbir Singh. Textbook of Anatomy and atlas.
4. Romans Cunningham's Manual of practical Anatomy (15th Edition).
5. Mohammad Shamim. Essential Anatomy.
6. Gray's Anatomy (38th Edition)
7. Atlas of Anatomy (Moscow Edition)
8. Pervis Textbook of Anatomy (Moscow, Mir Publications 1999)
