Ministry Of Higher Education

Badakhshan Medical Faculty

The Curriculum contents of Biology
(2002)

Prepared By: Assistant Prof. Dr. Abdul Qadir Burran

CONTENTS

INTRODUCTION

Methods And Concepts In Biology

THE CELLULAR OF LIFE

Chemical Foundation For Cells

Carbon Compounds In Cells

Cell Structure And Function

A Closer Look At Cell Membranes

Ground Rules Of Metabolism

Energy – Acquiring Pathways

Energy Releasing Pathways

PRINCIPLES OF INHERITANCE

Cell Division And Mitosis

Meiosis

Observable Patterns Of Inheritance

Chromosomes And Human Genetics

DNA Structure And Function

From DNA T Proteins

Control Of Gene Expression

Recombinant DNA And Genetic Engineering

MEDICAL GENETICS

PRINCIPLES OF EVOLUTION

Emergence Of Evolutionary Thought

Microevolution

Speciation

The Macro Evolutionary Puzzle

EVOLUTION AND DIVERSITY

THE PLANT STRUCTURE AND FUNCTION

Plant Tissues

Plant Nutrition and Transport

Plant Reproduction

Plant Growth and Development

ANIMAL STRUCTURE AND FUNCTION

Tissues, Organ Systems, and Homeostasis

Information Flow and The Neuron

Integration and Control: Nervous Systems

Sensory Reception

Integration and Control: Endocrine Systems

Protection, Support, and Movement

Circulation

Immunity

Respiration

Digestion and Human Nutrition

Water-Solute Balance and Temperature Control

Principles of Reproduction and Development

Human Reproduction and Development

ECOLOGY AND BEHAVIOR

Population Ecology

Community Interactions

2 of 3

Ecosystems
The Biosphere
Human Impact on the Biosphere

An Evolutionary View of Behavior
Adaptive Value of Social Behavior
Origin And Evolution Of Life
Bacteria And Viruses
Protistans
Fungi
Plants
Animals: The Invertebrates
Animals The Vertebrates
Human Evolution: A Case Study

Literature

1. Starr Taggart. Biology (Wads North 7th Edition)
2. Mader Human Biology (3rd Edition)
