A215 Lab

Skeletal: Skull
Anatomical Position

Palms UP
Toes FORWARD
Follow along?

• Want to grab a skull from cart and follow along as we present?
  – Kinesthetic learning works!!
  – Hands on learning is what anatomy is all about!
Pterion

• Junction of 4 bones:
  – Frontal
  – Parietal
  – Temporal
  – Great wing of sphenoid

• Clinical Significance:
  – Patient comes in with head injury from impact around pterion region…
  – Thin portion of skull + Middle meningeal artery runs underneath = Epidural Hematoma = bleeding into brain, needs immediate attn.
