Mathematic Property: \textit{atisDescriptiveValue}

(Mathematic properties are those properties that are part of the meta-theory and have been abducted from mathematics to be used as a tool to provide solutions concerning the theory. Those solutions may be assigned as values to components or relations of the theory and thereby become part of the theory.)

\textbf{Descriptive value}, \mathcal{A}(x), =_{df} \text{The APT&C score.}

\[ \mathcal{A}(x) =_{df} \langle P(D) \rangle \]

\textbf{Descriptive value} is a measure of a property \textit{defined by an APT&C score}.
