Purdue’s PLM Certificate Program: Teaching Online Using VM’s in the Cloud

Amy B Mueller, Assistant Professor of Practice
Purdue University

Abstract

Purdue University Department of Computer Graphics Technology offers a Product Lifecycle Management (PLM) Certificate Program for working professionals outside of a degree program. Developed in 2009 with the Boeing Company, the program has undergone significant content, format and technical changes. Available and appropriate to anyone in any industry, interactive exercises using VMs (Virtual Machines) in the cloud sets this program apart from other PLM Certificate Programs. This poster will describe the current configuration as well as lessons learned.
