

1. **Developing Cognitive Theory by Mining Large-Scale Naturalistic Data**
Michael N. Jones, *Indiana University*
2. **Sequential Bayesian Updating for Big Data**
Zita Oravecz, *The Pennsylvania State University*
Matt Huentelman, *Translational Genomics Research Institute*
Joachim Vandekerckhove, *University of California, Irvine*
3. **Predicting and Improving Memory Retention: Psychological Theory Matters in the Big Data Era**
Michael C. Mozer and Robert V. Lindsey, *University of Colorado*
4. **Tractable Bayesian Teaching**
Baxter S. Eaves Jr., April M. Schweinhart, and Patrick Shafto, *Rutgers University*
5. **Social Structure Relates to Linguistic Information Density**
David W. Vinson and Rick Dale, *University of California at Merced*
6. **Music Tagging and Listening: Testing the Memory Cue Hypothesis in a Collaborative Tagging System**
Jared Lorince and Peter M. Todd, *Indiana University*
7. **Flickr® Distributional TagSpace: Evaluating the Semantic Spaces Emerging from Flickr® Tags Distributions**
Marianna Bolognesi, *University of Amsterdam*
8. **Large-Scale Network Representations of Semantics in the Mental Lexicon**
Simon De Deyne, *University of Adelaide*
Yoed N. Kenett, *Bar-Ilan University*
David Anaki, *Bar-Ilan University*
Miriam Faust, *Bar-Ilan University*
Dan Navarro, *University of Adelaide*
9. **Individual Differences in Semantic Priming Performance: Insights from the Semantic Priming Project**
Melvin J. Yap, *National University of Singapore*
Keith A. Hutchison, *Montana State University*
Luuan Chin Tan, *National University of Singapore*
10. **Small Worlds and Big Data: Examining the Simplification Assumption in Cognitive Modeling**
Brendan Johns, *University at Buffalo*
Douglas J. K. Mewhort, *Queen's University*
Michael N. Jones, *Indiana University*

**11. Alignment in Web-based Dialogue: Who Aligns, and how Automatic is it?
Studies in Big-Data Computational Psycholinguistics**

David Reitter, *The Pennsylvania State University*

12. Attention Economies, Information Crowding, and Language Change

Thomas T. Hills, *University of Warwick*

James Adelman, *University of Warwick*

Takao Noguchi, *University College, London*

**13. Decision by Sampling: Connecting Preferences to the Real World's
Regularities**

Christopher Y. Olivola, *Carnegie Mellon University*

Nick Chater, *University of Warwick*

**14. Crunching Big Data with Fingertips: How Typists Tune Their Performance
Toward the Statistics of Natural Language**

Lawrence P. Behmer Jr. and Matthew J. C. Crump, *Brooklyn College of the City
University of New York*

15. Can Big Data Help Us Understand Human Vision?

Michael J. Tarr and Elissa M. Aminoff, *Carnegie Mellon University*
