

ARCHAEOLOGICAL SURVEY REPORT

Instructions: This report form was created by the California Department of Forestry and Fire Protection (CDF) to document an archaeological survey and impact evaluation for small-scale CDF projects. Complex investigations may require additional documentation. This report is intended for use by a CDF Archaeologist or a CDF Forester, RPF, or other resource professional that holds a current certification for completing a CDF Archaeological Training Course. The investigation documented in this report should be conducted under the guidance of a CDF Archaeologist and upon completion shall be submitted to a CDF Archaeologist for professional review and concurrence with findings. Include a map with this report. That map should be adapted from a portion of the USGS 7.5-minute quadrangle with the project area and archaeological survey findings clearly delineated. Additional maps in different scales may also be included. An electronic copy of this form and other information and assistance is available on the CDF Website at www.fire.ca.gov. Questions pertaining to the use of this form or archaeological surveys of CDF projects may be directed to CDF Senior State Archaeologist Dan Foster at (916) 653-0839.

Part 1: REPORT AUTHOR INFORMATION

Author of Report:

Address of Report Preparer:

Phone Number:

Date Report Prepared:

Report prepared by a person with current certification from a CDF Archaeological Training Course
Training Course Number:
Date of Course Completion:

Report prepared by a professional archaeologist

Part 2: PROJECT INFORMATION

Project Name:

Project Number (if applicable):

CDF Program:

Legal Location:

County:

Project Size (Acres):

Name of 7.5' USGS Quad Map:

Name of Landowner(s):

Project Description:

Part 3: PREFIELD RESEARCH

List the information sources that were checked during the investigation for this project and discuss the results of this research.

An archaeological records check was conducted at appropriate state Archaeological Information Center (IC) of the California Historical Resource Information System (CHRIS) (attach a copy of request form, map, and reply from the IC).
IC File #: Date of Reply:

Local Native American groups and individuals listed on CDF's *Native American Contacts List* were provided written notification of this proposed project and requested to identify any cultural resources that could be affected and inform CDF if there are any concerns.

Date project notification was mailed to local Native American groups:

List groups and persons contacted and attach copies of correspondence:

The Native American Heritage Commission was provided written notification of this proposed project and was requested to identify any cultural resources that could be affected or express any concerns. Attach copies of correspondence.
Date project notification was mailed to the NAHC:

Project is located on an existing CDF property.

- Inventory and Historical Significance Evaluation of the CDF Fire Lookout Stations (Thornton 1993)
- A Survey and Historic Significance Evaluation of the CDF Building Inventory (Thornton 1994)
- Management Plan for CDF's Historic Buildings and Archaeological Sites (Foster and Thornton 2001)
- Archaeological survey reports for the property (list):

Pertinent archaeological, ethnographic or historical literature reviewed (list references used):

Knowledgeable individuals (landowner, local archaeologist, etc.) consulted (list persons consulted):

Other prefield research conducted:

RESULTS OF PREFIELD RESEARCH:

Part 4: ARCHEOLOGICAL SURVEY METHODS AND RESULTS

(A) ARCHAEOLOGICAL SURVEY CONDUCTED BY (List name of surveyors):

The archaeological survey for this project was conducted by a person with current certification from a CDF Archaeological Training Course

Training Course Number:

Date of Course Completion:

The archaeological survey for this project was conducted by a professional archaeologist

No archaeological survey was conducted because archaeological, historical, or other cultural resources are unlikely to exist within the project area (explain):

No archaeological survey was conducted because the project activities do not have potential to adversely affect any archaeological, historical, or other cultural resources (explain):

(B) AREA SURVEYED (Briefly describe the locations of areas which received archaeological coverage and display the areas surveyed on an attached map(s) which should also depict the project boundaries:

(C) SURVEY METHODS (Briefly describe the methods, procedures, and level of effort employed during the survey. Discuss transect intervals, transect orientation, ground visibility, tools used, survey strategy, and length of time spent during survey):

(D) SURVEY RESULTS (List and briefly describe all archaeological, historical, or other cultural resources identified within the project area including any historical buildings that may exist. Prepare and attach site records for sites not

presently recorded or insufficiently recorded. Display the precise location of all resources listed here on the attached map(s).

- No archaeological, historical, or other cultural resources were identified within the project
- The following archaeological, historical, or other cultural resources were identified within the project (list and describe):

(E) PROTECTION MEASURES **N/A** (List each archaeological, historical, or other cultural resource identified during the study and indicate how each will be protected. Provide specific enforceable protection measures that will be incorporated into the project.

(F) FINDINGS-IMPACT ASSESSMENT **N/A** (Discuss whether or not project activities will cause impacts to archaeological, historical, or other cultural resources. When evaluating the effects, assume the protection measures listed in Part 4E are incorporated into the project.
