This is a GPSO Research Grant application for Spring 2011.

The grant will be awarded for research conducted between August 2011 and August 2012.

Once you begin this application you may not be able to come back and make changes. Please have the following ready before you begin this application:
- A brief summary of your research (300 words)
- An explanation of why your research is relevant
- A detailed budget of your research expenses
- A detailed timeline of your research project

**1. By checking the box below you agree that you have read and understand the above information regarding this research award application.**

I agree that I have read and understand the above information regarding this application.
2. Personal Information

1. Title:
   - Mr
   - Ms
   - Mrs

2. First name: 

3. Last name: 

4. E-mail: 

5. General department: (eg. Biology)

6. Specific program name: (eg. Cell & Molecular)

7. Campus address: (You'll be notified of the award results via e-mail)

8. Place in program:
   - Master's student
   - Doctoral student
   - Professional student

9. If you are a doctoral student, please indicate your current status:
   - pre-exam
   - post-exam

10. Are you currently enrolled in G901 or a dissertation or research credit hour?
   - No
   - Yes
 GPSO Research Awards Application  Spring 2011

3. Research Project Details

1. What is the title of your research project?

2. At what location do you plan to conduct this research?

3. On what date does your research project begin?

Date research begins  /  / YYYY

4. What is the name of your supervising professor?

5. Do you have IRB/BIACUC approval?

   Yes
   No
   N/A
4. Free Response Questions

* Please be sure to address all aspects of each question.
* Please complete each question within the allotted number of words. Answers which are over the allotted number of words will be truncated and therefore not used in the consideration of your application. Applicants need not use the maximum number of words for each question.

1. Provide an overview of your research project. For example, provide your research question, theory, methods, hypotheses and expected results (max. 300 words).

2. Explain the perceived importance of this research to your discipline and its broader importance or application. (max. 300 words)

3. Describe the impact this research will have on you professionally and how it is relevant to your area of study. (max. 300 words)
4. Provide a detailed budget of your research and explain how the GPSO Research Award will assist your research.

5. Provide a timeline for your research.
