MEDICAL LEAVE POLICIES FOR STUDENT ACADEMIC APPOINTEES

Whereas, graduate students of Indiana University are routinely funded through academic appointments; and

Whereas, Indiana University’s policy on Other Leaves and Absences for Academic Appointees (ACA-49) describes policies for sick leave and only to full time employees; and

Whereas, Indiana University does not currently have a policy in place to provide protections for student academic appointees in the event of illness or medical leave; and

Whereas, the lack of policy causes schools to determine their own policies for all students in the event of illness or medical leave; and

Whereas, many of the policies set by schools or departments leaves both the student and employees status of graduate/professional students unprotected in the event of illness; and

Whereas, some schools and departments have no official policy, leaving the student and employee status of graduate/professional students unprotected;

Therefore, be it resolved by the Graduate and Professional Student Government Assembly –

(1) that the Graduate and Professional Student Government advocates for the implementation of a university wide policy for all students that concerning the rights of students in cases illness; and be it further

(2) that a Task Force or Ad Hoc committee be created with the goal of drafting such a student parent and caregiver policy to be approved by the Board of Trustees for inclusion in the University Policies, where this committee shall be comprised of campus stakeholders, including the University Graduate School, the University Faculty Council, the Graduate & Professional Student Government, and relevant existing committees therein.

Respectfully submitted to and passed by the Graduate and Professional Student Government Assembly on this 7th day of April, 2017.
