These groups are based on Dialectical Behavioral Therapy skills. The goal of these groups is to help participants feel more balanced and in control of their lives. The skills focus on decreasing interpersonal chaos, labile emotions, impulsiveness, and cognitive dysregulation while increasing interpersonal effectiveness, emotion regulation, distress tolerance and mindfulness. The groups are broken into three skills training modules of 6-8 sessions each. In the spring, we are offering both Distress Tolerance and Interpersonal Effectiveness. Distress Tolerance Skills teach new coping skills to help people get through crisis without making things worse. The Distress Tolerance Skills target problem-coping behaviors such as self-injury, binging, purging, over-exercise, substance use, addictive behaviors, suicide, and angry outbursts. The Interpersonal Effectiveness Skills teaches you to communicate in a way which will increase the likelihood of achieving your objectives, maintaining relationships, and maintaining your self-respect. Talk to your counselor to determine if these groups will be helpful for you. Each group is $17 per session.
