SharePoint Update

Dear Scholars,

The Hudson and Holland Scholars Program uses SharePoint to track your progress towards meeting the Leadership, Excellence, Academics and Diversity (L.E.A.D.) requirements for the program. You ideally, should be able to log and track your progress towards meeting your HHSP requirements, but unfortunately we have experienced a HUGE technical issue with SharePoint that our IU technology folks are working to resolve.

In the meantime, we are going to TRUST you to keep track of what you have completed on your own, until SharePoint is repaired or an alternative to SharePoint is developed. Therefore, please do not worry about confirming with HHSP that you have completed any particular requirements for your class year. When the system is fixed or when another system is developed, we will let everyone know and you will have ample opportunity to go back and enter the information. Again, we TRUST you to do this!

PS We do have records of who attended the Diversity Leadership Conference (DLC).
