- Exploiting the Educational Potential of Podcasting, another guide to podcasting for educators: <http://recap.ltd.uk/articles/podguide.html>
- Podcasting Information at IU: <http://uits.iu.edu/page/aufp>

Garageband Tips (things to watch out for):

Getting Started:

- Which version of GB? We're showing Garageband 4 (part of iLife '08)
- Did you start with a "New Podcast Project"?
- What area or object is currently selected?
- Where is the playhead?
- Do you have the right track selected?
- Loop Browser vs. Track Editor view.
- Track Info vs. Media Browser view.
- Turn on "Snap to Grid" and "Show Alignment Guides" (see Control menu).

Setup & Recording:

- Is the Recording Level set high enough (usually 72% - 82% depending on microphone)?
- Are you getting feedback because of built-in microphone AND built-in speakers?
- Make sure to set Input Source to "Mono 1".
- Make sure Monitor is properly set to "On" or "Off" depending on your desired needs.
- Make sure Control → Metronome is off (unchecked)!
- "Count In" can be extremely helpful when recording (see Control menu).
- Is "Ducking" turned on (see Control menu)?

Post-production & Sharing:

- Add any chapter titles, URL titles, and URLs in the Track Editor
- Make sure Episode Artwork and any chapter images are properly displayed by double-clicking and editing them if necessary.
- Easiest way to get podcast out of Garageband: Share → "Send Podcast to iTunes"
- After export, podcast can be made available to audience via iTunesU, Oncourse, or website.
