**Student Success Collaborative (SSC)**

**Purpose of the SSC**
1. Identifies **major-specific success markers**, indicators of successful graduation culled from years of data
2. Analyzes **student data** to aid advisors in supporting student success, including retention, certification into programs, degree progress, time-to-degree, and graduation
3. Analyzes and displays **institutional data** to provide advisors and administrators with insightful information

**Advisor Uses of the SSC**
1. **Advisor can intervene early** (pre-probation instead of after probation) by noting progress related to success markers
   EXAMPLES:
   - Notice a few Ws in key courses related to declared major
   - Catch a slight lack of timeliness in taking key courses related to declared major
   - Attend to slightly lower-than-recommended grades in key courses
2. Advisor can **reinforce progress** for students who are doing well
3. Advisor can **organize caseload for outreach**
   - Opportunities for specific groups
     EXAMPLES:
     - Find high-performing students to consider as Supplemental Instruction leaders or Teaching Assistants
     - Encourage students with high GPAs to apply for the honors program
     - Encourage all freshmen to utilize academic support services
     - Encourage pre-dental students to attend information session
     - Encourage all Sophomore Spanish majors to consider studying abroad
   - Reminders for specific groups
     EXAMPLES:
     - Remind freshmen about the W deadline for first 8-wk courses
     - Remind students with GPA of 2.0-2.5 about academic support services
     - Remind seniors about applying for graduation
4. **Advisor can track outreach** efforts and their results for individual students and groups of students
5. **Advisor can add personal reminders** to individual student records in order to:
   - Follow up with the student about specific issues
   - Check on particular results so you can congratulate a student
   - Remember circumstances or situations that are non-academic or otherwise outside AdRx

**Student Use of the SSC**
With advisors, student can view major options and careers that result from those majors

**Key Features of the SSC**
1. Displays **student data**
   - Success markers by major
     - Specific courses
     - Timeframes for taking the courses
     - Grades in the courses
   - Multiple data points
     - Past and current enrollment
     - GPA, credits per term
     - D/F/W courses
     - GPA, credits per term
     - Student groups, advisor
     - Etc.
   - Shows level of RISK, related to graduating with this major, based on completion of success markers

2. Allows **use of data filters to quickly identify groups of students** for specific outreach campaigns
   EXAMPLES:
   - Freshmen pre-Biology majors with GPAs below 3.0
   - Junior Honors students with GPAs from 3.5-4.0
   - Business majors, in the Direct Admit group, assigned to this advisor, with GPAs from 0.1-2.3 (or 3.7-4.0)
3. **Provides option to track results** of outreach campaigns
4. Displays **institutional, aggregate data** for groups of students meeting identified criteria
5. Compares potential for student success in **various majors**
6. Use **Major Explorer** to:
   - Search for careers by major
   - Search for related majors by career
Student Success Collaborative (SSC)

Resources for the SSC

- Access to the SSC
  - Advisors submits FERPA and document security forms
  - Supervisor asks campus program owner to submit ARMS request
  - Click on campus-specific SSC platform through OneStart → Academic Advising

- Create EAB Profile: EAB.com → member log-in → create profile → sign up for updates
Hints & Reminders for the SSC
(Add your own tips; contact OCSS@iu.edu to add them to the generic overview document.)

OCSS@iu.edu
In the SSC

Institutional Analytics Tab
Choose a major in your program and identify:

- The number of students pursuing that major as the primary major (second majors are not included here)
- The average cumulative GPA of the majors
- The number of students, in this major, on probation
- The number of students, in this major, with high risk

Using the SSC Overview
look up the following information for each student

<table>
<thead>
<tr>
<th>Student</th>
<th>Overall RISK</th>
<th>Courses with D or F</th>
<th>Courses Repeated</th>
<th>Courses with W</th>
<th># Completed Credits</th>
<th>Cumulative GPA</th>
<th>Declared major(s)</th>
<th>Assigned Advisor(s)</th>
<th>Student Groups</th>
</tr>
</thead>
<tbody>
<tr>
<td>Unit-Specific UID #1</td>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>Unit-Specific UID #2</td>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>Unit-Specific UID #3</td>
<td></td>
<td></td>
<td></td>
