Goal: By the end of the course, students will be able to describe and apply sociotechnical interventions that improve health and well-being.

Learning Objectives:
Students who complete the course should be able to:

- Discuss past, ongoing, and emerging research in health informatics.
- Summarize health informatics research conducted at Indiana University.
- Give examples of the skills and practices necessary to collaborate with medical researchers.
- Recognize intra-, inter-, and transdisciplinary research.
- Design and evaluate health related assistive and performance support applications.
