HUBI-S 200 32751 The Intricate Human, Honors
F. Bashey-Visser, Andrew Libby
TuTh 9:30-10:45 a.m.
MO 107

This class meets with HUBI-B 200.
Interdisciplinary study of the human organism including genetics, metabolism and other aspects of physiology, behavior, culture, and environmental context. Case-based approaches to specific content will reflect faculty expertise, student interests, and current issues in human biology. Emphasis is placed on developing scientific literacy and implementing the scientific method. Credit given for only one of S200, B200 or B101.
