P: K201 or K204 with a grade of C or better and admission to the Hutton Honors College or the Business Honors Program.

X202 substitutes for X201, an I-Core prerequisite that is required of all business majors. It consists of two components: a lab and a lecture; students must enroll in both components concurrently. The course provides an introduction to a range of technologies currently used in organizations including a broad understanding of how technologies are deployed, their impact and potential, and their strategic importance. Student projects focus on technologies that transform data into usable information to enhance decision making. They rely heavily upon Microsoft Excel and, to a lesser extent, Microsoft Access to develop sophisticated data analysis and modeling tools. X202 is the honors version of X201, and it shares the same basic course content as X201. However, its in-class applications and its projects and exams are more challenging than those in X201. Students may not get credit for both X202 and X201.
