Tour the Integrated Science and Accelerator Technology Hall and learn about accelerators and radiation. ISAT Hall is the home of the Center for Exploration of Energy and Matter, and IU Cyclotron Operations, which supports the IU Health Proton Therapy Center. Tours will include a brief overview, followed by a 45-minute walking tour. For safety reasons, children must be over 13 years old to go on the tours.

See:

- **The Cyclotron**, with its 2 million lb. magnets that accelerate protons to speeds of more than 100,000 miles per second, over half the speed of light!

- **The linear accelerator at LENS**, the Low-Energy Neutron Source which provides scientists with unique tools to study the structure of materials at atomic scales.

- A **demo on radiation** readings with a Geiger counter, and learn what materials are used for radiation shielding.

Take the Yellow School bus, and visit ISAT Hall!  
(Bus departs from 3rd Street, in front of Swain Hall West)
