Have you just completed P101? Enroll in P102 next semester. Also consider P211 or K300 (described below).

Have you completed P155 or P106? If you’ve completed P155 or P106 you have many choices. Many of you will take P211 and many will move on to the 300-level foundational courses, psychology electives, or statistics. While it may feel strange to skip from 100-level to 300-level courses, this is what many students do.

Foundational courses required for all psychology majors:
- PSY-P 304 - Social Psychology & Individual Differences: P: P155 or P101 or P106 or equivalent.
- PSY-P 335 - Cognitive Psychology: P: P155 or P101 or P106 or equivalent.
- PSY-P 346 - Neuroscience: P: P155 or P101 or P106 or equivalent.

Research methods & statistics courses required for all psychology majors.
- PSY-P 211 - Research Methods: P: P155 or P101 or P106 or equivalent.
- PSY-K 300 - Introduction to Statistical Techniques: P: MATH M118 or M119.

What if you are registering for courses for next semester and you can't get into P211 or one of the other courses listed above? You might want to take an elective:
- PSY-P 303 - Health Psychology: P: P155 or P101 & P102 or P106.
- PSY-P 315 - Developmental Psychology: P: P155 or P101 & P102 or P106.
- PSY-P 324 - Abnormal Psychology: P: P155 or P101 & P102 or P106.
- PSY-P 329 - Sensation and Perception: P: P155 or P101 or P106. R: MATH M026 or M119 or introductory physics.
- PSY-P 351 - Psychobiology, Self, and Society: P: P155 or P101 or P106.

What about P199 Planning Your Career (P: P155 or P101 & P102 or P106)? Are you ready to plan your career? Ready to create a professional resume based on experiences you’ve had since you’ve started college? Are you ready to contact professionals working in a career of interest to you and interview them about their career? Ready to start planning for grad school? Psychology majors are required to take P199 and it is strongly encouraged that you take it in your sophomore year. Do not put it off because it can help you figure out what you should you be doing during your sophomore through senior year to prep for your future career and for grad school if required for your future career.

What if you can't get into any upper-level psychology classes that you feel ready to take? Focus on completing your GenEd and CASE requirements and look forward to the fact the your ability to get the classes you want will improve as your class standing advances. If you’re concerned about your ability to do well in Neuroscience (P346) you might want to consider taking Introduction to Neuroscience (P201) - but you should know that P201 does not fulfill any requirement for the psychology major.
