PSY K300, Spring 2017
Statistical Techniques – Syllabus

CLASS TIME AND PLACE
Lecture Section 7601
Wed and Fri, 9:05 – 9:55 AM, PY 100

LECTURE INSTRUCTOR INFORMATION
Instructor: Rick Hullinger
Office: PY A300B
Office Hours:
   Monday, 1:30 — 4:00 PM
   Tuesday, 1:30 — 4:00 PM
   Wednesday 10:30 AM — 12:00 PM
   Or by appointment
Office Telephone: 856-6854
Email Address: rahullin@indiana.edu

LAB INSTRUCTOR INFORMATION
Lab Instructors:
   Edward Koenig (ejkoenig@indiana.edu)
      Section 29971: M 9:05 – 9:55 AM
      Office Hours: TBA
   Julie Eyink (jeyink@indiana.edu)
      Section 29973: T 9:30 – 10:20 AM
      Office Hours: TBA
   Steven Sherrin (ssherrin@indiana.edu)
      Section 29975: T 11:30 AM – 12:20 PM
      Office Hours: TBA

COURSE GOALS
Many students think of K300 as a math course. While it is true that we will perform some calculations along the way, this course is not about the math. We would consider this class a failure if what you learned to do was to plug numbers into arbitrary formulas for unknown reasons in order to generate meaningless answers. Instead, we want you to think about the underlying logic and principles of statistical analysis so that you understand what the numbers tell you (and what they don’t tell you), not just how to generate them.

This course will explore statistical analysis in a hands-on way. We’ll generate and analyze data in a series of lectures and interactive lab exercises. This semester you will tackle the process of statistical inference using a variety of different approaches. Along the way you will gain a grounded understanding of how statistical inference works, and you will learn how to apply statistical techniques to new problems that you encounter after leaving the class. You will become a more savvy consumer of the statistical (mis)information that bombards you every day and a better researcher should you choose to go in that direction.

In this course, successful students will be able to:
- Select and calculate appropriate descriptive statistics and make visual representations of data.
- Demonstrate an understanding of the importance of sampling randomness and measurement noise in statistical inference.
- Understand population parameters and how to estimate them.
- Pick an appropriate statistical technique to test a hypothesis about a particular treatment or experiment.
- Explain and interpret p values with respect to the null and alternative hypotheses.
• Perform a variety of statistical analyses either by hand or with the appropriate software tools.
• Discuss a set of results including p values, confidence intervals, and effect sizes, with respect to real world relevance and suggested next steps.
• Identify and critique examples of good and bad statistical reasoning in the popular press.
• Identify problems with classical statistical techniques and demonstrate an awareness of alternate methodologies including Bayesian ideas

TEXTBOOK & COURSE MATERIALS
We will not be using a textbook for this course. All of the readings and notes that you need will be presented in class and/or provided for you on Canvas.

LECTURE PARTICIPATION
Clickers (Turning Technologies Response Cards) will be used in this class, and you are required to have one. Except for the first week of the semester, there'll be at least one clicker question in each lecture. There will be 28 such lectures, and students must submit responses in at least 20 of those lectures to earn full credit. Your participation in the clicker questions is a key way to improve learning in the large lecture hall, and to provide feedback to the instructor. Students who submit responses in fewer than 20 lectures will have their lecture participation grades reduced. Clickers are used as formative assessment so there is no penalty for incorrect answers, but students who are routinely answering randomly will not receive participation credit. Clicker misconduct (e.g., responding with someone else’s clicker, possessing more than one clicker in class, etc.) will be considered a serious offense, and will result in confiscation of clickers, grade reductions in K300, and other university sanctions. If your clicker malfunctions or you forget your clicker, you are permitted to write your responses on a paper for only one lecture. Regardless of emergency, there will be no excused absences, and if you miss class for any reason it must count toward the eight “dropped” lecture participation marks.

LAB EXERCISES AND FOLLOW-UPS
There will be 12 sets of lab exercises throughout the semester. Work in the labs will be done collaboratively, in groups of 2 – 4 students, but you must submit your own completed lab worksheet, through Canvas, at the end of the lab period. Each lab exercise will also have a follow-up activity for you to complete at home and submit via Canvas. These follow-up exercises must be complete independently to ensure that you understand the concepts covered in the lab. Late labs and follow-up activities will not be accepted. Your lowest lab and lab follow-up scores will be dropped from the final grade calculation.

EXAMS
There will be two exams during the course of the semester. The first portion of each exam will be an in-class exam that will cover your understanding of the conceptual basis of statistics. This portion of each exam will be closed-book, closed-note, and you will not need a formula sheet or calculator. At the lab after each in-class exam, you will be given a take-home exam. The take-home exams will ask you to demonstrate a mastery of the concepts you have learned by analyzing new sets of data and explaining the concepts behind the tools used for analysis. You are free to discuss the content and concepts of the take-home exams with your classmates, but the work you submit must be your own.

Each exam will focus primarily on the new material learned since the previous exam, but questions about older material may be included as well. During finals week (8am, on Wednesday, May 3rd) there will be a cumulative, conceptual final exam similar to the in-class exams taken during the semester.
If you have a scheduling conflict that will interfere with a lab, turning in an assignment, or taking an exam at the scheduled time, you must let me know as soon as possible. With the exception of extreme and unforeseen circumstances, contacting me the day of (or even worse, after) an assignment or exam is due will be considered an unexcused absence and will result in a zero on the late work.

Your final grade is computed using the following formula:

- **Lecture Participation:** 5%
- **Average of your eleven best lab exercises:** 20%
- **Average of your eleven best follow-up exercises:** 20%
- **Average of your two in-class exams:** 20%
- **Average of your two take-home exams:** 20%
- **Final Exam:** 15%

**Grading Scale:**

- **A+:** 97.0%-100%; **A:** 93.0%-96.99%; **A-:** 90.0%-92.99%
- **B+:** 87.0%-89.99%; **B:** 83.0%-86.99%; **B-:** 80.0%-82.99%
- **C+:** 77.0%-79.99%; **C:** 73.0%-76.99%; **C-:** 70.0%-72.99%
- **D+:** 67.0%-69.99%; **D:** 63.0%-66.99%; **D-:** 60.0%-62.99%
- **F:** Below 60%

**STUDENT RESPONSIBILITY**

It is your responsibility to double-check your assignment and exam grades – both that the papers themselves were correctly graded and that the scores posted on Canvas match your actual grades. You have two weeks from the time an assignment or exam is returned to the class to address any grading issues. After that, the grades posted on Canvas will be considered final.

**EXTRA CREDIT?**

Nope.

**EMAIL**

We expect you to be checking your IU e-mail account no less than once a day. We will send frequent messages to the class with announcements, clarifications, instructions, and/or updates. You are responsible for the content of these messages exactly as if the material had been presented in class. Saying “I didn’t read that e-mail” or “I haven’t checked my e-mail for a few days” will not be considered a valid excuse for missing information. All class-wide messages will be sent using the Canvas Announcement tool, so archived messages can always be found on the Canvas sites.

**FEEDBACK**

Do not wait until the end of the semester course evaluations to let me know that I could be doing something better. Tell me as soon as possible so that I can make the class valuable and relevant as we go along. If you have any feedback, good or bad, about the course or how it’s being taught, please feel free to send it to me anonymously using this link:

[http://www.indiana.edu/~rahteach/feedback.html](http://www.indiana.edu/~rahteach/feedback.html)

**ACADEMIC HONESTY**

This course is conducted under the University's Ethics Code. Specifically, it is considered cheating if you obtain any kind of information about answers and solutions to the assignments in this course – exams...
and homework – from any non-intended source or conversely transfer such information to others. It is also considered cheating if you lie to me about an absence relating to a homework assignment or an exam. The punishment for academic dishonesty will be no less than a zero on the assignment or exam and will likely be failure of the course. As per university policy, all incidents of academic misconduct must be reported to the Dean of Students office.

CLASS RECORDINGS
I will be using the Echo360 course capture system record and distribute the K300 class lectures to you through Canvas. Because I will be recording in the classroom, your questions or comments may be recorded. You may watch recordings online, or download them for off-line viewing on your computer, smartphone, or media player. These recordings are copyrighted by me, and provided by me and the University for your personal use. Please see the copyright statement below for the full terms of use. Due to possible unforeseen technical issues, I cannot guarantee that all class sessions will be properly recorded. It is important that you attend class, actively participate, and take notes. If you miss a class session, you cannot assume that a recording will be available.

STATEMENT FOR STUDENTS WITH DISABILITIES
Every attempt will be made to accommodate qualified students with disabilities (e.g. mental health, learning, chronic health, physical, hearing, vision neurological, etc.) You must have established your eligibility for support services through the appropriate office that services students with disabilities. Note that services are confidential, may take time to put into place and are not retroactive; Captions and alternate media for print materials may take three or more weeks to get produced. Please contact Disability Services for Students at http://disabilityservices.indiana.edu or 812-855-7578 as soon as possible if accommodations are needed. The office is located on the third floor, west tower, of the Well Library, Room W302. Walk-ins are welcome 8 to 5, Monday to Friday.
