EN 5: Outreach Campaign

4 points available

A. Credit Rationale
This credit recognizes institutions that hold sustainability outreach campaigns that yield measurable, positive results in advancing the institution’s sustainability performance (e.g. a reduction in energy or water consumption). Campaigns engage the campus community around sustainability issues and can help raise student and employee awareness about sustainability. In addition, campaigns encourage students and employees to adopt or try sustainable practices and lifestyles.

B. Criteria

Part 1
Institution holds at least one sustainability-related outreach campaign directed at students that yields measurable, positive results in advancing sustainability. The sustainability-related outreach campaign may be conducted by the institution, a student organization, or students in a course.

Part 2
Institution holds at least one sustainability-related outreach campaign directed at employees that yields measurable, positive results in advancing sustainability. The sustainability-related outreach campaign may be conducted by the institution or an employee organization.

The campaign(s) reported for this credit could take the form of a competition (e.g. a residence hall conservation competition), a rating or certification program (e.g. a green labs or green office program), and/or a collective challenge (e.g. a campus-wide drive to achieve a specific sustainability target). A single campus-wide campaign may meet the criteria for both parts of this credit if educating students is a prime feature of the campaign and it is directed at both students and employees.

To measure if a campaign yields measurable, positive results, institutions should compare pre-campaign performance to performance during or after the campaign. The following impacts are not sufficient for this credit:
- Increased awareness
- Additional members of a mailing list or group

C. Applicability
This credit applies to all institutions.
D. Scoring
Each part is scored independently.

Part 1
An institution earns the maximum of 2 points available for Part 1 of this credit for having one or more sustainability-related outreach campaigns that are directed at students and yield measurable, positive results in advancing sustainability. Partial points are not available for Part 1 of this credit.

Part 2
An institution earns the maximum of 2 points available for Part 2 of this credit for having one or more sustainability-related outreach campaigns that are directed at employees and yield measurable, positive results in advancing sustainability. Partial points are not available for Part 2 of this credit.

E. Reporting Fields

Required
- An indication of whether the institution holds at least one sustainability-related outreach campaign directed at students that has yielded measurable, positive results in advancing sustainability
- An indication of whether the institution holds at least one sustainability-related outreach campaign directed at employees that has yielded measurable, positive results in advancing sustainability
- An affirmation that the submitted information is accurate to the best of a responsible party's knowledge and contact information for the responsible party. The responsible party should be a staff member, faculty member, or administrator who can respond to questions regarding the data once submitted and available to the public.

Conditional
Required if the institution is reporting a sustainability-related outreach campaign:
- For each campaign, report:
  - The name of the campaign(s)
  - A brief description of the campaign(s)
  - A brief description of the measured positive impact(s) of the campaign(s)

Optional
- The website URL where information about the sustainability outreach campaign(s) is available
- Notes about the submission
F. Measurement

Timeframe
Report on the most recent campaign(s) for which data is available. Campaigns held more than three years prior to the anticipated date of submission are not eligible for this credit.

Sampling and Data Standards
Institutions may use a representative sample to measure pre-campaign baseline and post-campaign performance.
Credit Example: Outreach Campaign

To earn this credit, an institution must demonstrate that an outreach campaign led to a measurable, positive impact on its sustainability performance. In order to measure whether the campaign positively impacted the institution’s sustainability performance, institutions should compare performance before the campaign to results during or after the campaign. Examples of how to measure impacts from various campaigns follow.

Example 1: An on-campus competition
Example University had a residence hall vs. residence hall energy conservation competition in which on-campus residents learned energy conservation tips and tools. To measure the impact of the campaign, the university compared residence hall electricity consumption during the month before the competition to consumption during the month of the competition. (There were no major differences in occupancy or other factors that would influence electricity consumption during either month.)

Since electricity consumption decreased during the month of the competition, the institution can demonstrate that the campaign led to a measurable, positive impact on its sustainability performance.

Example 2: A campus-wide challenge
Example Community College participated in RecycleMania, a nationwide competition between colleges and universities to increase recycling. During the competition, the institution conducted outreach and held events about the benefits of recycling. Prior to the competition the institution was recycling 30 percent of its total waste. Following the competition, the institution recycled 35 percent of its waste. (There were no other major events or changes that would have influenced the recycling rate during either month.)

Since the recycling rate increased following the outreach campaign, the institution can demonstrate that the campaign led to a measurable, positive impact on its sustainability performance.

Example 3: An outreach campaign
Example College conducted an outreach campaign to decrease the consumption of bottled water on campus. Before the campaign, the bookstore sold about 5,000 bottles of water per week. After the campaign, bottled water sales dropped to 3,000 bottles per week. (There were no other major factors that would have influenced bottled water sales during either month).

Since bottled water sales decreased after the outreach campaign, the institution can demonstrate that the campaign led to a measurable, positive impact on its sustainability performance.
