Western University is investing in a Cluster of Research Excellence in Cognitive Neuroscience to build on significant research strengths in this area. Details on the Clusters and Western Research Chairs program can be found at www.uwo.ca/research/wcre/. We invite applications from exceptional early or mid-career investigators to fill 3 tenure-track (probationary) positions at the level of Assistant or Associate Professor to support the Cluster of Research Excellence in Cognitive Neuroscience. If qualifications and experience warrant, the appointment will be made at the Associate Professor rank with tenure. Qualified applicants must have a Ph.D. and/or M.D. or equivalent degree and be recognized nationally and internationally for excellence in cognitive neuroscience research. The successful candidates must have demonstrated an outstanding research record of publishing in the highest quality journals, and where appropriate, evidence of a successfully funded research program and supervision of graduate students and postdoctoral fellows. Outstanding researchers in any area of cognitive neuroscience will be considered. These positions will complement three Western Research Chair positions in Cognitive Neuroscience currently being recruited. The positions will commence on July 1, 2015 or as negotiated.

The successful candidates will be appointed into an appropriate academic Department at Western and will be expected to establish and maintain a vigorous externally-funded research program; teach and supervise undergraduate, graduate and postdoctoral research trainees, and demonstrate the potential for developing innovative approaches within a collaborative research environment. They will also become members of the world-renowned Brain and Mind Institute (www.uwo.ca/bmi). Facilities at Western include a full range of high and ultra-high field, research-only, MRI scanners (3T, 7T, and 9.4T), fully equipped, state-of-the-art laboratories for cognitive and behavioural testing, a sleep laboratory, and access to a large neurological patient population in affiliated teaching hospitals. Cognitive Neuroscience is a key area of research strength at Western University with more than 25 Principal Investigators and nearly 200 trainees in the Brain and Mind Institute.

With a full-time enrolment of 32,000, Western University is leading research-intensive university with a full-range of academic and professional programs. General information about Western can be found at www.uwo.ca. The university campus is in London, a thriving city of 500,000 people, located midway between Toronto and Detroit. With parks, river valleys, tree-lined streets, and bicycle paths, London is known as the “Forest City” and boasts an international airport, galleries, theatre, music and sporting events see (www.ledc.com) Western’s Recruitment and Retention Office is available to assist in the transition of successful applicants and their families.

Applicants are invited to submit a letter of interest, a Curriculum Vita, statement of research interests, the names and contact information of three references, and completed Application for Full-Time Position at http://www.uwo.ca/facultyrelations/pdf/careers/Faculty/Application-FullTime-Faculty-Position-Form.pdf in confidence to:

Dr. John P Capone
Vice President, Research
Western University
London ON N6A 5B8 CANADA
email: vpr@uwo.ca

Applications will be accepted until the positions are filled. Review of applications will begin on April 1, 2015.

Positions are subject to budget approval. Applicants should have fluent written and oral communication skills in English. All qualified candidates are encouraged to apply, however, Canadian and permanent residents will be given priority. Western University is committed to employment equity and diversity in the workplace and welcomes applications from all qualified individuals, including women, members of visible minorities, aboriginal persons, persons with disabilities and persons of any sexual orientation or gender identity.
